

Future of IT In Space Applications and Services

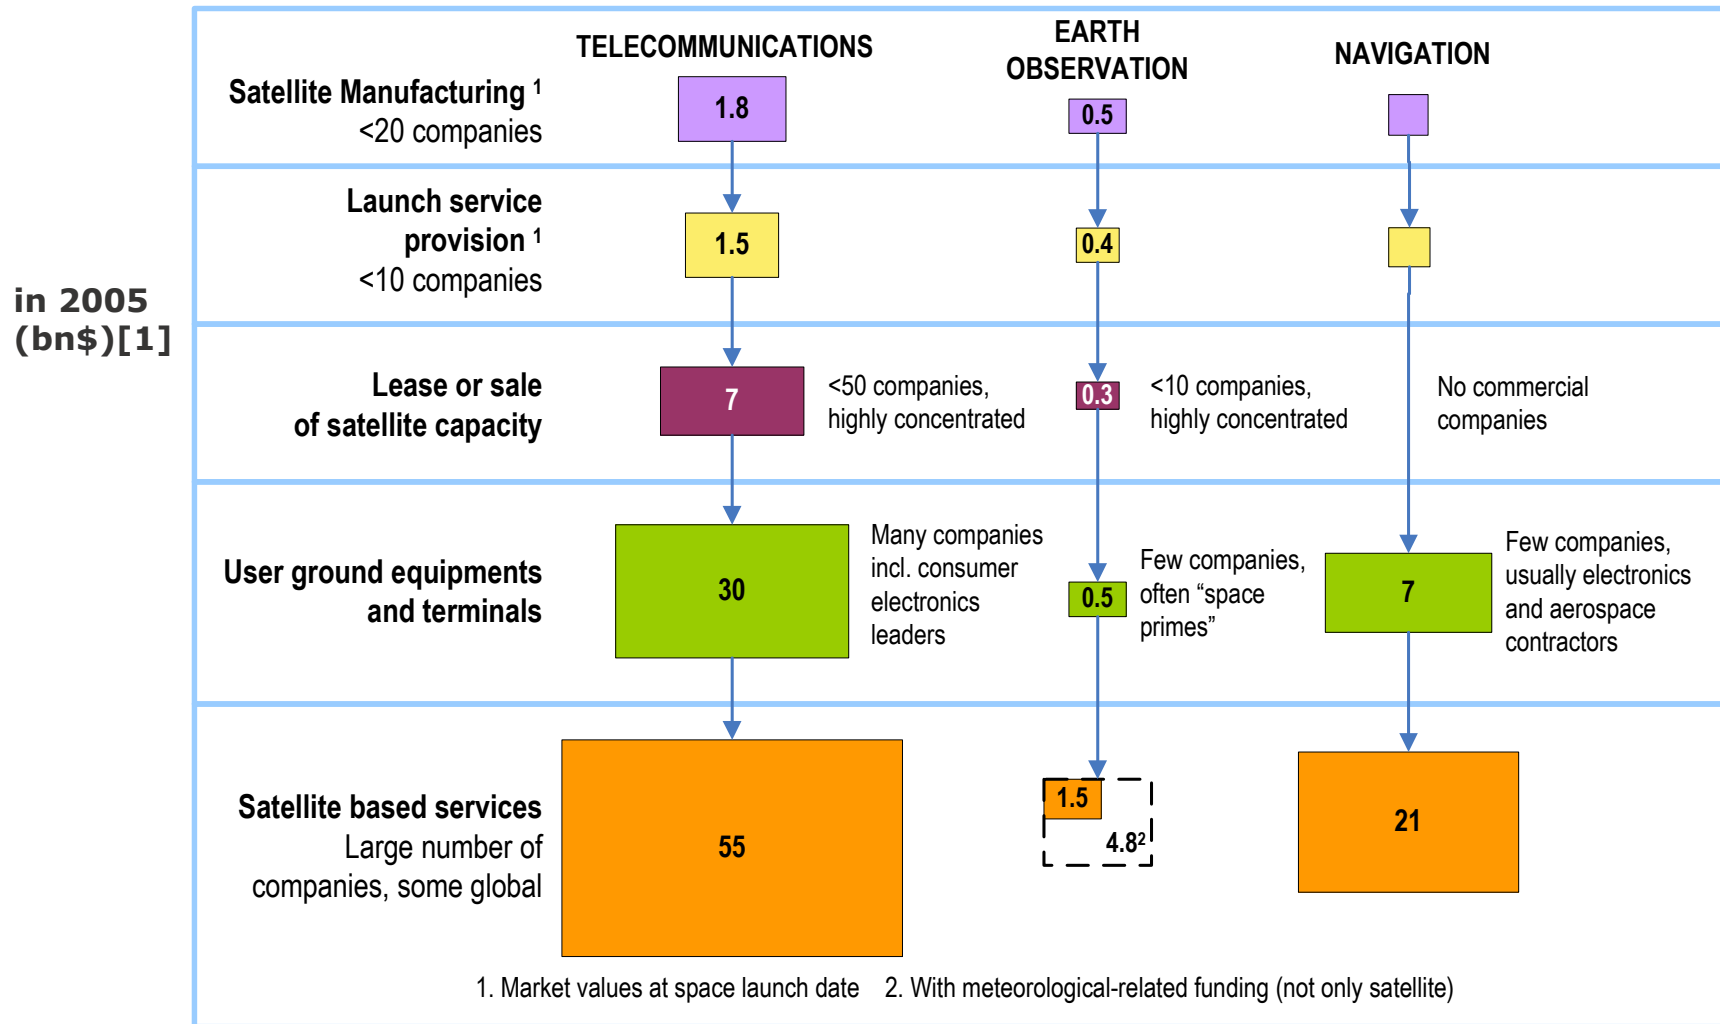

Tallinn, May 2010

IT In Space

The 3 Value chains in commercial satellite operations

1] OECD, the Space Economy at a Glance 2007, November 2007

So, where are the future challenges and opportunities?

- Sustainability
 - Balancing the 3 'P's: People, Planet and Profit
 - Creating a *sustainable* future across all industry sectors
 - Ensuring the sustainability of the space industry itself
- Security
 - Data Security
 - Security of the Citizen
 - Security of our way of life
- Future IT, and 'The Cloud'
 - Embedding Space applications and services into The Cloud
 - Moving The Cloud into Space

Thank you
